How it works

Electrostatic Spraying System

Our Professional Cordless Electrostatic Sprayer provides maximum coverage by spraying less liquid, and covering more surfaces. The patented technology provides an electrical charge to solutions, allowing them to wrap conductive surfaces with an effective and even coverage. Double-charged particles envelope all conductive surfaces – shadowed, vertical and underneath.

Anti-Microbial Disinfectant

Our sanitizing solution works as an effective sanitizer, disinfectant, tuberculocide, virucide*, fungicide, algacide, general-purpose antimicrobial and cleaner. Kills harmful viruses like Coronavirus, Hepatitis A, HIV, Norovirus, Herpes Simplex type 2, Influenza-A and more. The product is EPA registered and tested as a broad-spectrum hospital grade disinfectant. It works in minutes and leaves no residual.
